Clinical Support Services

The GME Consortium will monitor availability of patient support services such as i.v. teams, phlebotomy services, laboratory services, radiography technical services, messenger and transporter services through the annual resident/clinical fellow survey. Through this vehicle the GME Consortium will also monitor security measures provided to residents/clinical fellows.

The GME Consortium requires that participating institutions provide their services as part of the affiliation agreement.

GMEC Revised/Approved November 14, 2011
