Policy on Duty Hours/Moonlighting

Graduate Medical Education, sponsored by the GME Consortium, is a full time experience. Patients have the right to expect their care delivered by alert, healthy, responsible and responsive physicians. Additional working time may result in excessive fatigue and must be carefully monitored by program directors. If such authorization is granted, the House Officer must obtain permanent licensure, a personal DEA number, and a personal BNDD number. Documentation of outside employment and the written authorization will be part of the resident’s or fellow’s file. Outside employment is defined as the practice of medicine for financial remuneration that is not recognized as part of the training program by the Program Director. Any House Officer who violates this prohibition will be subject to Disciplinary Action, including possible termination from his / her respective training program. The guidelines for monitoring and reporting duty hours can be found in the ‘Consortium Policy for Monitoring and Reporting Duty Hours’, which is attached to this document as Appendix H. Each program will develop written program-specific policies on duty hours and moonlighting.
